BOOK SYNOPSIS

The BNF for Children (BNFC) provides essential practical information to all healthcare professionals involved in the prescribing, dispensing, monitoring and administration of medicines to children. The resource addresses a significant knowledge gap in many areas of paediatric practice by providing practical information on the use of medicines in children of all ages from birth to adolescence. Recommendations in the BNF for Children have been constructed on the basis of authoritative sources, emerging evidence and best practice guidelines. The content has been carefully validated by a network of paediatric experts and the process is overseen by a paediatric formulary committee. To make it even easier to find the information you need, the content in the new BNFC 2015-2016 has been restructured. The BNF for Children 2015-2016 has been revised and revalidated to reflect changes in product availability, emerging safety concerns and shifts in clinical practice.
